DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title:

The title has been replaced with "Semiconductor device with capacitor formed around contact hole".

End of examiner's amendment.

Allowable Subject Matter

2. Claims 1, 20-26, and 33-42 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of claim 1, in particular the limitations that there is a capacitor formed around the contact hole in the insulating layer and the an electric field parallel to the face of the substrates is applied between the pixel and common electrodes. For instance, *Katayama*, U.S. Patent No. 6,100,947, discloses a

capacitor around a contact hole, but not in an parallel field device. Claim 1 is therefore allowed, as are its dependent claims 20-22.

Similarly, the prior art does not disclose the device of claims 23 and 33, having analogous limitations to those discussed above. Claims 23 and 33 are therefore allowed, as are their dependent claims 24-26 and 34-37. Similarly, the prior art does not disclose the device of claim 38, in particular the limitations that the capacitor is formed around the contact hole in the first insulating layer, and it is an IPS display device (which is a parallel electric field device). Claim 38 is therefore allowed, as are its dependent claims 39-42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
